DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because of the grammatical error in lines 9-10: "for a vehicle a housing". Correction is required. See MPEP § 608.01(b).
2. The disclosure is objected to because of the following informalities:
 - a. Page 6, Lines 12-14: Figure 4 contrasts with the disclosure, whereby the emitted beam 24 is no shown to be 60 degrees below the beam axis 26;Appropriate correction is required.

Claim Objections

3. Claim 9 is objected to because of the following informalities: Applicant should remain consistent with reference numerals [e.g., (1...2) or (i...ii)]. Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-9 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over Claims 1-10 of copending Application No. 10/649,894 in view of VanRiper et al. (U.S. Patent 4891625).

Claims 1-10 of 10/649,894 set forth the invention substantially as claimed except for use as a CHMSL.

VanRiper teaches a combination center high mounted stop lamp (CHMSL) and cargo lamp.

It would have been obvious to one ordinarily skilled in the art at the time of invention to modify Application No. 10/649,894 to incorporate the CHMSL of VanRiper in order to provide a "single unit [that] can provide a center high mounted stop lamp visible to a following vehicle and also provide the added feature of cargo area illumination [see Column 1, Lines 32-35 of VanRiper]."

This is a provisional obviousness-type double patenting rejection.
